

REVIEW

for the syllabus "Economics"
of the third (educational and scientific) level of higher education in the specialty
051 "Economics" of field 05 "Social and behavioral sciences"
of the National Aviation University

In a dynamically developing environment, business entities and non-business structures, as well as public administration are constantly increasing the requirements for staffing their activities. As a result, the labor market and potential employers have recently increased interest in attracting highly qualified specialists, i.e. the third educational and scientific level of higher education, which corresponds to the degree of Doctor of Philosophy in the relevant specialty.

The syllabus "Economics" in the specialty 051 "Economics" is aimed at training specialists of the third (educational and scientific) level of higher education for the training of a doctor of philosophy. The aim of the syllabus is to train highly qualified specialists who have the theory, methodology and tools of scientific research, able to create and produce new knowledge in the field of economics.

Professional competencies of the specialty and syllabus learning outcomes of the developed syllabus reflect its focus on the formation of applicants' skills to develop scientifically sound recommendations for the implementation of fundamental economic mechanisms and patterns; methodological analysis of economic theories and concepts, development research and applied methodology, methods of economic research and practical work.

Training of specialists in the degree of Doctor of Philosophy in "Economics" is carried out by effectively combining traditional teaching methods and modern educational technologies, such as information and communication training, training with interactive methods and training in technology.

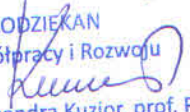

The syllabus "Economics" of the third (educational-scientific) level of higher education in the specialty 051 "Economics" submitted for review can be used in the
