INTRODUCTION

Course Training Program on «Philosophy» is developed based on the «Methodical guidance for the subject course training program of the full-time and part-time modes of study», approved by the order № 249/од, of 29.04.2021 and corresponding normative documents.

1. EXPLANATORY NOTES

1.1. Place, objectives, tasks of the subject

The place of the academic discipline. «Philosophy» is included in the list of the mandatory components of educational and professional programs of the first (Bachelor) level of higher education of all specialties.

Main target to study the subject is mastering the basic concepts, notions, methods of the world philosophy and its history; the skills of their usage in both scientific and professional activities, of orientation in a complex world based on the development of modern scientific and philosophical worldview. Philosophical training of students is an important component of the training of a modern specialist to master his future profession.

The tasks of the discipline study are:

- mastering the basic provisions of the discipline;
- mastering the means of philosophical analysis of the problems of human life and the development of science;
- development of skills and abilities to independently substantiate, argue and illustrate theoretical positions with specific examples that are related to the professional activities of civil aviation specialists.

Course Training Program is approved by the guarantors of educational and professional programs of the first (Bachelor) level of higher education, in particular, regarding the place, objectives, tasks, and content of the academic discipline «Philosophy» to achieve the objectives and program learning outcomes, as well as obtaining the competencies provided for by these educational and professional programs, in the context of the formation of the worldview and civic qualities of students of higher education, their moral values and general cultural training, the formation of their methodological foundations for original thinking and research, critical reflection on theories, principles, methods and concepts in the field of professional activity and training.

1.2. Competences and learning outcomes the subject makes it possible to achieve.

The academic discipline, together with other educational components of each educational and professional program where it is taught, allows achieving program learning outcomes determined by the educational and professional program, foremost, correlated with the achievement of general competencies – universal competencies that do not depend on the subject area, but are important for a successful further professional

	Quality Management System Course Training Program on «Philosophy»	Document Code	QMS NAU CTP 8-12.01.10–01–2023
		p. 5 із 22	

and social activities of the applicant for higher education in various branches and for his personal development.

Such general competencies, directly or indirectly related to the general competencies provided for by each educational and professional program, include, in particular, the most relevant general competencies for each specialty from the European Union (European Commission) Project "Tuning Educational Structures in Europe", indicated, in particular, in the order of the Ministry of Education and Science of Ukraine dated June 1, 2017 No. 600 (as amended in the Ministry of Education and Science of Ukraine order dated April 30, 2020 No. 584) and standards of higher education of the first (Bachelor) level:

- on the basis of a thorough knowledge of philosophy to develop the ability for abstract thinking, system approach, analysis and synthesis;

- capacity to learn and stay up-to-date with learning, to form an independent style of thinking, one's position;

- ability to apply the acquired knowledge in the analysis of urgent problems of the present;

- ability to search for, process and analyse information from a variety of sources;

- ability to make reasoned decisions, to understand their socio-economic, environmental, moral, and aesthetic consequences in the professional field;

- the ability to realize the values of a civil (free democratic) society and the need for its sustainable development, the rule of law, the rights and freedoms of man and the citizen in Ukraine;

- ability to be critical and self-critical;

- ability to identify, pose and resolve problems;

- ability to plan and manage time;

- ability to adapt to and act in new situations;

- capacity to generate new ideas (creativity);

- ability to work in a team, to achieve consensus, and make joint decisions;

- ability to motivate people and move toward common goals;

- ability to communicate with representatives of different professional groups across varying social levels (with experts from other fields of knowledge/types of economic activity);

- appreciation of diversity and multiculturalism;

- ability to work in an international context;

- ability to work autonomously;

- ability to design and manage projects;

- ability to take the initiative and to foster the spirit of entrepreneurship;

- ability to act on the basis of ethical reasoning;

- ability to determine and persist in mastery-approach goals and assigned duties;

- commitment to conservation of the environment;

- ability to act with social responsibility and civic awareness;

- ability to show awareness of equal opportunities and gender issues;

- ability to apply knowledge in practical situations.

	Quality Management System Course Training Program on «Philosophy»	Document Code	QMS NAU CTP 8-12.01.10-01-2023
		p. 6 із 22	

According to some educational and professional programs, the academic discipline, together with other educational components, allows for achieving special (professional, subject matter) competencies determined by these educational and professional programs, depending on the specialty, knowledge, and specifics of each such educational and professional program.

To the main learning outcomes, which, together with other educational components of each educational and professional program, the educational discipline allows to achieve and which are directly or indirectly correlated with the above-mentioned general competencies, and are also characteristic of the standards of higher education of the first (bachelor) level of higher education in all specialties, include the following knowledge, abilities, skills, ways of thinking, views, values and other personal qualities:

- to know the main content, directions of philosophical thought, classical and current domestic and world philosophy, the main works of thinkers of the foreign and Ukrainian philosophical thought of the past and the present;

- to reveal the skills of logical, critical, and systematic thinking, to form one's position;

- awareness and consideration of social, environmental, moral, and economic aspects when making decisions, evaluating performance, and defending the decision made;

- independently analyze ontological, epistemological and methodological problems;

- to apply philosophical theories and methods when necessary to tackle complex research problems in the field of exact and natural sciences;

- to apply philosophical theories and methods when necessary to tackle complex research problems in the field of socio-economic sciences and the humanities;

- to use the acquired theoretical knowledge in philosophy to analyze the necessary information, substantiate management decisions incorporating the required analytical and methodological tools;

- to demonstrate the ability to apply an interdisciplinary approach;

- to present reasoned arguments clearly, consistently and logically competently and draw rational conclusions convincingly;

- to communicate effectively at the professional, scientific, and social levels based on tolerance, dialogue, and cooperation;

- to demonstrate the skills of autonomous work, acquisition of a flexible mind, openness to new knowledge, ability to be critical and self-critical;

- to integrate the acquired knowledge to develop national culture, humanism, democracy, and personal self-improvement.

1.3. Interdisciplinary Connections

The academic discipline «Philosophy» supplements professional academic disciplines in the preparation of applicants for the master's educational level as a theoretical and methodological basis. The educational discipline "Philosophy" is interconnected with the disciplines of the humanities and natural sciences. Knowledge and skills obtained in the studying process of this academic discipline are used in the future in study of many subsequent disciplines of the student's professional training.

2. COURSE TRAINING PROGRAM ON THE SUBJECT

2.1. The subject content

Training material is structured according to the module principle and consists of **two educational modules:**

- **Module № 1 «Philosophical Propaedeutics»,**
 - **Module № 2 «Philosophical Problems of Society»,**
- that are logically complete, relatively independent, holistic part of the subject, learning of which provides module test of its performance.

2.2. Modular structuring and integrated requirements for each module Module № 1 «Philosophical Propaedeutics»

Integrated requirements to the module №1:

Know:

- features and characteristics of philosophical thinking; structure and main functions of philosophy;
- historical features of the emergence of philosophy as a theoretical system of knowledge;
- basic principles, laws, categories of dialectics;
- the link of the concept of being with the human way of self-affirmation in the world;
- problems of the main philosophical schools of ancient philosophy, their importance for the development of modern philosophy;
- natural and social factors of origin and functioning of consciousness, its components, and functions;
- the essence of human existence; the meaning of the concepts of "human being", "human life", "human existence";
- types, levels and forms of cognition; features of scientific knowledge;
- methods of scientific knowledge, their classification.

Be able to:

- to highlight elements of philosophical thinking, outline the functions of philosophy in society;
- to apply the characteristics of leading philosophical positions to the analysis of worldview ideas;
- to comprehend the processes occurring in nature and society from the standpoint of a dialectical understanding of reality;
- to analyze the levels of existence and their understanding in specific sciences and philosophy;
- to apply the structural units of consciousness to understand the features of human conscious perception of reality;
- to comprehend the main components of the human way of life for self-assessment

	Quality Management System Course Training Program on «Philosophy»	Document Code	QMS NAU CTP 8-12.01.10–01–2023
		p. 8 із 22	

and evaluation of life processes;

-to compare life experience, scientific and artistic knowledge.

Topic 1. **Philosophy: its Range of Problems and Role in Society**

The Worldview and Its Socio-Historical Character. Problems of worldview formation and its main components. Everyday and theoretical levels of the worldview, their ratio. Historical forms of worldview: mythological, religious, philosophical. The subject of philosophy. Peculiarity of philosophical problems. «Man–world» relations as a basic problem of philosophy. Functions of philosophy: sociocultural, worldview, methodological, gnosiological, axiological.

Topic 2. **The emergence of philosophy as a theoretical system of knowledge**

Sociocultural conditions for the formation of philosophy as a theoretical system of knowledge. Development of ideas in the natural philosophical schools of ancient Greece. Changing philosophical issues in the transition to "high classics". Sophists and Socrates. Plato's philosophical system. Aristotle's philosophical teachings. Ideas and schools of the final stage of development of ancient philosophy.

Topic 3. **Outline Theory of Dialectics**

Two ways of philosophical knowledge of the world: dialectics and metaphysics. Dialectics and its historical forms. The principles, laws, categories of dialectics. Law of the unity and struggle of opposites. Law of the transformation of quantity into quality. Law of negation of negation. Categories of dialectics: single, particular, universal; phenomenon and essence; form and content; cause and consequence; necessity and chance; fortuity and necessity; reality and possibility; system, structure, element and others.

Topic 4. **Philosophical Theory of Being**

«Being» as philosophical category. Concept of the world. Unity and structuredness of being. Peculiarity of human being; being and existence. The category «matter» in philosophy. Material being: nature and things of «second nature». The specifics of human existence as a thing among things. Individualized and objectified spiritual being. The notion of «substance». «Matter» as a philosophical category. The correlation of philosophical and scientifically-natural understanding of matter. Motion, space and time as attributes of matter. Space and time are forms of existence of matter. Social space and social time as forms of human being in culture.

Topic 5. **Philosophical Conception of Man**

Problem of anthroposociogenesis. The notion and essence of anthroposociogenesis: scientific, philosophical and religion approaches. Basic concepts of the essence of man as a social being. Man, individuality and personality. The concept of values. The basic values of human existence. Approaches to the problem of life and death in historical-philosophical tradition. Sense of human life: purpose, ideal and opportunities of realization. Place of freedom, necessity and will in human life.

	Quality Management System Course Training Program on «Philosophy»	Document Code	QMS NAU CTP 8-12.01.10–01–2023
		p. 9 из 22	

Topic 6. **Consciousness, its origin and essence.**

Origin and essence of consciousness as a problem of philosophy, science, religion. Consciousness as reflection and the process of construction of reality. Objectivity and ideality of consciousness. Activity, thinking and language. Structure of consciousness: sensual-emotional, emotional-volitional, and abstract-logical components of consciousness. Consciousness and unconscious. Self-consciousness.

Topic 7. **Man’s Mastering and Cognition of the World.**

The concepts «mastering» and «cognition» in philosophy. The basic forms of man’s mastering of the world: spiritual-theoretical, spiritual-practical, object-practical. The problem of the truth in philosophy. The process of cognition as an active creative attitude of man to the world. Levels of knowledge. Practice as basis and purpose of cognition. The subject and object of cognition, their interaction.

Topic 8. **Scientific Cognition. Science as a Cultural and Civilizational Phenomenon.**

Distinctive features of scientific knowledge. Subject and object of scientific knowledge. The concept of an ideal object in science. Levels of scientific knowledge: empirical and theoretical. Methods and forms of scientific knowledge. Intuition and creativity in the process of cognition.

Module № 2 «Philosophical Problems of Society»

Integrated requirements to the module №2:

Know:

- what society is and what its main functions are;
- what elements makeup society as a holistic system that ensures the social life of the mankind;
- the ratio of progress and regress;
- the meaning of the concept of «culture» in philosophy;
- the structure of the material and spiritual culture, the relationship between them;
- subject and tasks of the philosophy of history;
- basic philosophical approaches to understanding the problems of orientation and meaning of history, the driving forces of history, the role of the masses, and the person in history;
- the concept of the Universe in philosophy and science;
- the phenomenon of globalization and its philosophical understanding;
- the basic principles of the concept of «sustainable development».

Be able to:

- to analyze the real processes of social life, explain specific examples of progress and regress in the development of society;
- to outline the internal and external forces of society;
- to explain the main features of the information society;

	Quality Management System Course Training Program on «Philosophy»	Document Code	QMS NAU CTP 8-12.01.10–01–2023
		p. 10 із 22	

-to identify the dialectics of productive forces and production relations as a source of social development;

-to explain the main differences between the processes of human history and the processes of nature;

-to describe the features of the main philosophical approaches to the problem of periodization of the historical development of mankind;

-to explain the causes and ways to overcome today's global problems

Topic 9. Society as a Form of Coexistence of People.

Basic philosophical conceptions of society. Society as a system. Natural-geographical, economic and socio-cultural approaches to understanding society. Society as a form of coexistence of people. Social being and social consciousness. Structuredness of the social system. Progress and regress in social development. Internal and external driving forces of society.

Topic 10. Social Production as a Way of Human Existence in Culture.

Notion of culture in philosophy. Culture as a symbolic world of human existence. Culture as a «second nature». The concept of social production as human production. Material culture and its structure. Nature as a source and environment of human life, society. The dialectics of productive forces and production relations. The concept and main stages of scientific and technological progress. Essential features of the information society.

Topic 11. Spiritual Culture, Its Structure.

The phenomenon of spiritual culture. Specifics of spiritual production and spiritual culture. Social consciousness as a result of spiritual culture. Social consciousness and its structure: levels, forms of organization and functioning. Social psychology and ideology. The concept of "mass culture", "elite culture", anti-culture.

Topic 12. Philosophy of History

History as object of philosophical research. The material and spiritual bases of a historical process. Historical periodization of civilizational development of mankind: formational, civilizational, axial, wave approaches. The ratio of evolution and revolution in human development. The driving forces of history and the problem of its meaning. The role of the masses and the individual in history. The concept of "people", "masses of people" in socio-philosophical theories. The relationship between the concepts of "historical figure" and "outstanding person".

Topic 13. Strategy of Future.

The concept of the Universe in philosophy. Global problems of today: their causes and ways of overcoming. The phenomenon of globalization. The theory of globalization in philosophy. Signs of globalization. Positive and negative consequences of globalization. The concept of sustainable development.

2.3. Training schedule of the subject

№	Theme (thematic section)	Total, hour			
		Total	Lectures	Practical classes	Self-study
1	2	3	4	5	6

4. RATING SYSTEM OF KNOWLEDGE AND SKILLS ASSESSMENT

4.1. Assessment of certain kinds of student academic work is carried out in accordance with table 4.1.

Table 4.1

Kind of Academic Work	Maximum Grade Values	Kind of Academic Work	Maximum Grade Values
4 semester			
Module № 1 «Philosophical Propaedeutics»		Module № 2 «Philosophical Problems of Society»	
Kind of academic work	Grade values	Kind of academic work	Grade values
The answer for practical classes (8 points x 2)	16	The answer for practical classes (8 points x 2)	16
Carrying out express tasks for practical classes (9 points x 1)	9	Carrying out express tasks for practical classes (4 points x 2)	9
<i>For admission to complete module test №1, a student must receive not less than</i>	<i>15 points</i>	<i>For admission to complete module test №2, a student must receive not less than</i>	<i>15 points</i>
Carrying out Module Test №1	15	Carrying out Module Test №2	15
Total by the Module №1	40	Total by the Module №2	40
Total by the Modules №1, №2			80
Semester examination			20
Total by the subject			100

4.2. Completed types of educational activities are credited to the student if he/she receives a positive ratings for them (Appendix 1).

4.3. The sum of rating assessments received by the student for certain types of completed academic work is the current modular rating assessment, which is recorded in the module control.

4.4. The Current Module Grade and the Module Test Grade make up a Semester Module Grade which is calculated according to the National Scale and the ECTS Scale.

4.5. An Examination Grade in points is determined as a result of performing all kinds of examination tasks approved by the graduate department in accordance with the established procedure.

The Semester Module Grade and the Examination Grade together make up a Total Semester Grade which is calculated according to the National Scale and the ECTS Scale.

4.6. The Total Semester Grade in points and in the National Scale and the ECTS Scale is written into an examination sheet, a student's academic card and individual curriculum.

Appendix 2

Correspondence of the final semester rating grade to the grade based on the national scale and the ECTS scale

Grade in points	Grade in national scale	Grade in the ECTS scale	
		Grade	Definition
90-100	Excellent	A	Excellent (outstanding performance but with only minor errors)
82-89	Good	B	Very good (above the average standard but with some errors)
75-81		C	Good (generally sound work with a number of notable errors)
67-74	Satisfactory	D	Satisfactory (fair but with significant shortcomings)
60-66		E	Sufficient (performance meets the minimum criteria)
35-59	Fail	FX	Fail (some more work required before the credit can be awarded)
1-34		F	Fail (considerable further work is required)

(Ф 03.02 – 01)
