1.1. The main theories of the origin of the state and law

The state did not always exist. And it is difficult to determine the moment or date when we can clearly call the beginning of the formation of the first state. There are many theories about their origin, which interpret the reasons for the emergence of the state and law in different ways.

Theological (religious) theory (Thomas Aquinas (1225-1274). explains the origin of the state and law by divine will, relying on the Bible, he justifies its eternity and inviolability, justifies any reactionary states; any encroachment on the state is doomed to failure;

Patriarchal theory. Aristotle, R. Filmer, M. Drahomanov connect the emergence of the state with the historical process of family growth, the unification of clans into tribes, and tribes into the state. State power is a continuation of paternal (patriarchal) power exercised by the monarch in the state;

Contractual theory of the origin of the state and law. G. Grazius, B. Spinoza, J. J. Rousseau, D. Locke, T. Hobbes, D. Diderot, O. Radishchev believed that the state is the result of an agreement reached between the rulers and the population of a certain territory in order to ensure order and organization social life;

The theory of conquest. K. Kautskyi, L. Gumylovych, E. During believed that the state arises as a result of the conquest of some peoples by others; the state is the force formed by the conquerors to keep the conquered peoples in subjection and to strengthen the complete power over the defeated;
